DOMESTIC VIOLENCE FATALITIES

July 1, 2021 - June 30, 2022

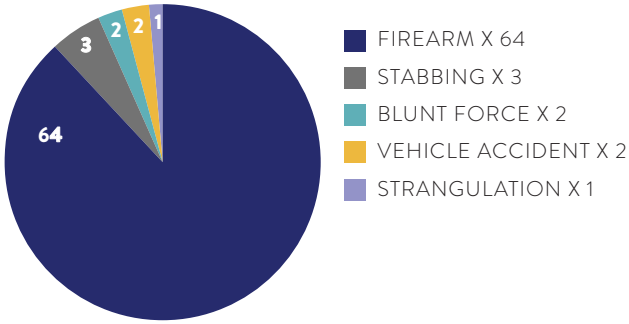
72 FATALITIES resulting from **46 INCIDENTS.**

The Indiana Coalition Against Domestic Violence and the Indiana Domestic Violence Fatality Review Team want to provide some brief insight into deaths related to intimate partner violence for the given time period. The authors acknowledge that this information represents only those deaths which are identified and known and that there are more losses that are not known to us. We also encourage the reader to use this information with compassion. As a part of the data collection for our Re-Centering Report (http://icadvinc.org/movement/) survivors of intimate partner violence told us that they find messaging of domestic violence death statistics triggering and harmful to their healing process. Statistically, fatal incidents are outliers, a tragic but small piece of the puzzle. When we link domestic violence directly with deadly incidents, we are minimizing what a majority of survivors are experiencing on a daily basis.

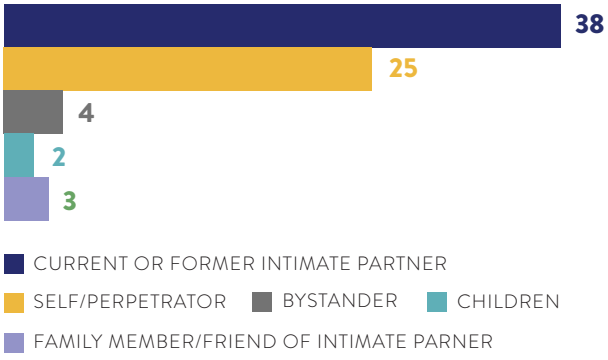
GENDER OF DECEDENT

* Please note, the gender reported is based on publicly available sources and typically corresponds to the gender assigned at birth, not necessarily the gender identity each person may have been expressing at the time of their death.

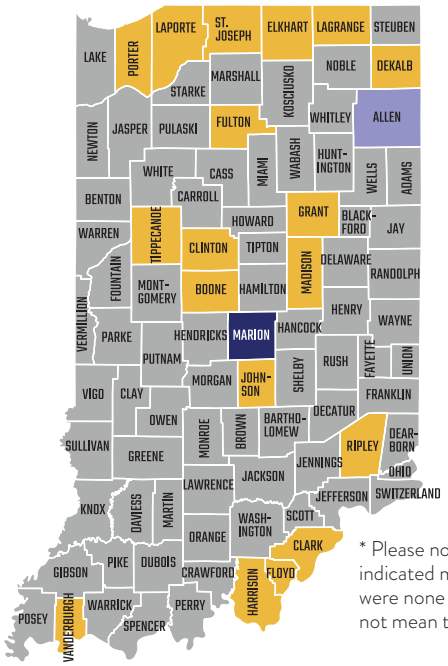
MANNER OF FATAL INJURY



RELATIONSHIP TO PERPETRATOR

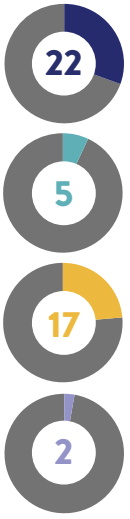


FATALITIES BY COUNTY



* Please note, 0 fatalities indicated means that there were none reported. This does not mean that 0 occurred.

TYPE OF FATAL INCIDENT



SINGLE FATALITY
(Incident where a single individual was killed.)

MULTIPLE FATALITY
(Incident where two or more individuals were killed, that does not include the abusive partner dying by suicide.)

HOMICIDE/SUICIDE
(Incident where abusive partner killed victim and /or others before dying by suicide.)

MULTIPLE HOMICIDE/SUICIDE
(Incident where more than 1 person is killed by the abusive partner before they die by suicide.)
